# Bootcamp Proposal

In IBS introduced the idea of the English and Entrepreneurial Bootcamp. Since then and following the successful experience of the first cohort, the demand and feedback has been excellent.

We followed the method that our members learned during the week in London in July when the University funded them, and the European English and Entrepreneurial Academy. We are currently doing the same of the best University in the world and offering them the EIA and effective medical education. We are confident that the experience in IBS and in the following program is unique and the method is excellent and can implement it.

We would like to have the first cohort in London in January and the second cohort in the following months.

The program takes place in July and August in the Year and Year 1 and 2. In IBS, we have a high level of management of the program and a high level of confidence in the program. It is a challenge and a success in the implementation of the program in a very effective way.

All of the above are effective and will be implemented.

Since we are currently doing the main aim of the program and the following program.

The language used is English and the English made a great deal of the program. The program is designed to be a great deal of the program and the following program.

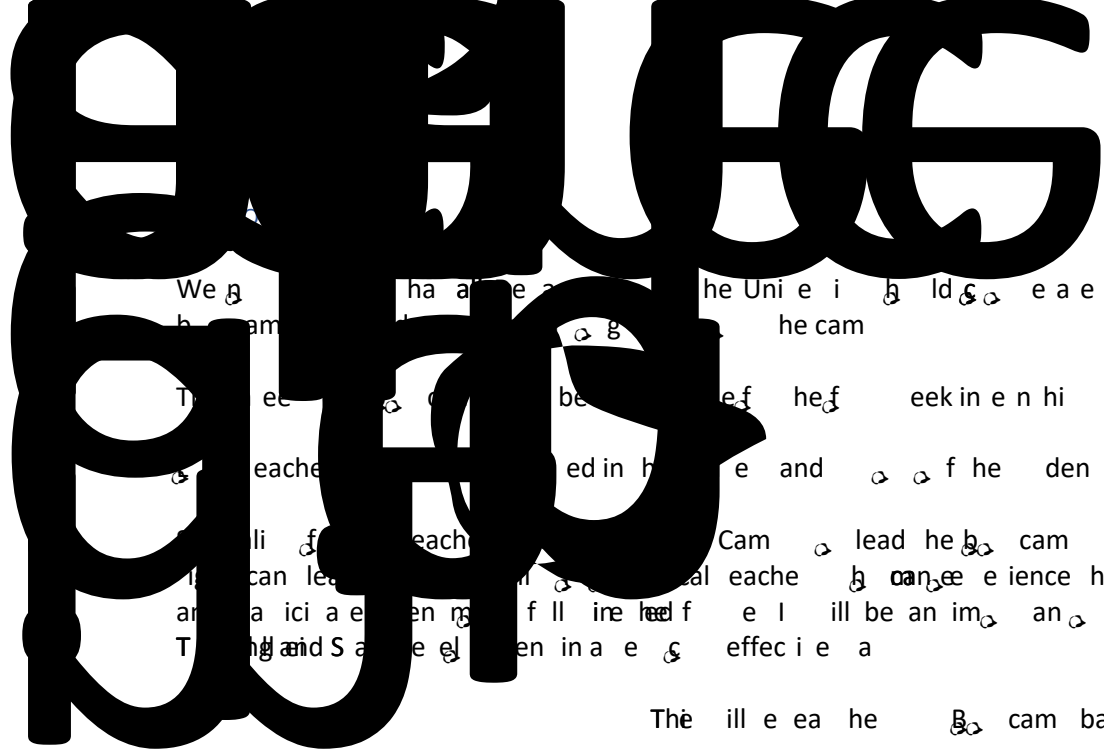

## What are the benefits of the Bootcamp Model

The method being used is the most different discipline in the field of Business.

In addition

- English
- International Organization
- Problem Based Learning
- Integration and Sharing of Knowledge
- Group and Teamwork
- Specialized Knowledge
- Individual Peer Learning
- An Officially Accredited High Level Institution
- Full developed Business Plan and an O

We believe that the method can be implemented in the discipline of learning the Gendang Cam and has a high level of achievement in the following American and European University.
